Work Experience

Junior Sofware Developer (Khanum)   June 2022 - Jan 2023

– I developed the frontend of a social media app that helped connect esthetician and doctors to patients with React Native and ReactJS,

Internship (LAZco)   Aug 2021 - December 2021

– I helped maintain a legacy ERP written in Delphi7 that attented

Unifrota   July 2023 - Present

– I developed multiple new systems for an legacy ERP, an app and a web dashboard for vehicle fleet managenment

1. A payroll control that tracked the working hours of colaborators.
2. A journey system that tracked the working hours of vehicles.
3. A tire managenement system that tracked the lifespan of tires and the frequency that they should be retreaded along with measures of the tread.
4. Helped remove a legacy system that was costing the company unnecessary amounts.

Projects

Okonomicus   www.okonomicus.com

Okonomicus is a fundamentalist stock analysis webtool that I am developing with my father. My main goal is to create and compile everything that I value when analysing stocks and managing finance in a life long project
